

Roman toy horse

You will need:

Template

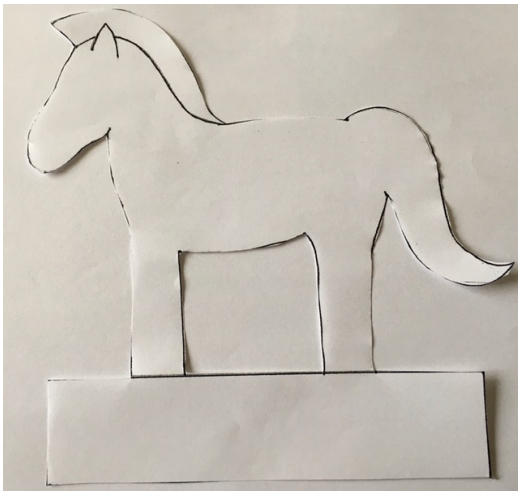

Scissors

Glue

Cardboard

Carboard tube

Colouring pens/pencils

Start by cutting out and colouring template.

Now glue your template to a piece of card board and cut out, this will help strengthen your horse stand up.

Next take a cardboard tube and cut two pieces about 5cm long. Then cut out a small slot in each going about halfway through the tube.

Now place your cut-out horse on to the slots in the cardboard tubes to make your roman toy horse.
