

## PAPER SPRING BOUQUET

### You will need:

- Green A4 paper
- Glue
- spring bouquet template (from the West Cheshire Museums website)
- Scissors
- Felt-tip pens

### How to make your bouquet:

1. Take your green piece of A4 paper and fold it over and over again to create a concertina effect

2. Take this green 'concertina' and fold in half.

3. Glue the two inside edges of the two halves so that you have a complete concertina semi-circle - let the glue dry out well. Take one of these halves (or quarters of the original piece of paper) and make concertina folds all the way along it.

4. Print off the spring flowers template and colour the flowers in with the felt-tips - the brighter the better! Cut the flowers out - an adult will have to help with this bit. You may wish to draw your own flowers freehand - that's ok too. Be creative as possible.

5. When you have cut out the flowers arrange them onto your green background to create your own paper spring flower bouquet.
