

## Feather wall hanging.

You will need:

String, scissors, thread, beads, comb and blue tack.

Start by cutting about 80- 100 pieces of string approx. 20cm long

Now cut a piece of string approx. 60cm long, fold in half and tie a not at the top forming a small loop.

Using a piece of blue tack stick the look to a flat working surface.

Take a piece of your cut string and fold in half then place under your long piece of string. Fold the loop end over the string and pull the tow ends through the loop to create a knot.

Repeat the same process on the other side.

Keep adding string in the same way until your side strings are a similar length the long piece in the middle.

using the centre length of string carefully tie a knot at the bottom of the side strings, this is to stop your sliding down.

Lay your feather on a piece of scrap cardboard and slowly start brushing out the threads of your string, leaving about 1cm at the top.

When you have brushed out all your threads place back on a workable surface and blue tack in to place. Gently comb your feather in to place.

Fold a piece of A4 paper in half and cut out a feather shape, place on top of your string and carefully cut around.

Using a piece of thread loop through the top of your feather and slide on a few beads. Tie a knot to secure them in place tie a second knot about 2.5cm further up this it so that you hang your feather up.

Hang your feather up, why not try making several to hang at different lengths.
