

## Nodding teddy

1/ Print off the Nodding Teddy Bear template from the website onto card stock - if you don't have this then you can cut all the pieces out in paper and use them to draw round onto a piece of cardboard from an old cereal packet. Cut all the pieces out.

2/ Colour in the pieces you have - I chose to paint them as I had some paints at home but it is ok to either use coloured pencils or felt-tips too.

3/ Use a black felt-tip to draw on the paw markings and the bear's eyes and colour in the ears. I also used paper to create the bear's eyes.

4/ Push the split pin through the bear's nose and then through the top of the big circle - the bear's body - and spread the pin out on the back (see my photo)

5/ Glue on the bear's paws and legs

6/ You can leave your bear with just his 'fur' or you can make some clothes for him using coloured paper or (if you don't have any) plain paper which you can then colour in. To create shorts like I have done, you could use the bigger circle to draw round

7/ Glue any clothes onto the bear's body.

8/ Hold your bear and make his head nod from side to side.

HAVE FUN AND BE CREATIVE!
