

Pop up Father's Day card.

You will need: Card, glue, scissors, template, colouring pencils/pens

To start fold a piece of A4 card in half, put A small mark in the centre of the folded line then mark 2cm either side. Now draw a 3cm line from each mark from the centre line towards the edge of the paper and then cut along both lines.

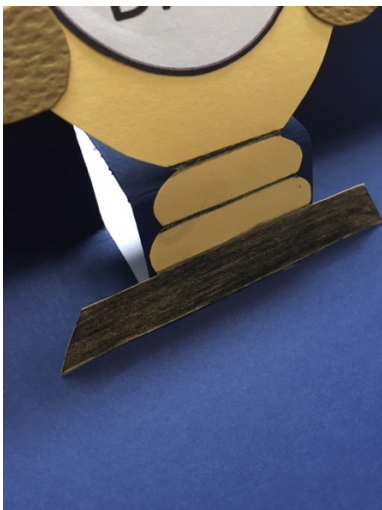

Now you will need to push the centre piece that the you have just cut through to the other side of the card.

Cut out and colour the DAD letters from the template or you can make your own, stick in place to the front of your card.

Using the template cut out the trophy and glue on the handles and badge, add colour detail to make your trophy look 3d.

Glue the bottom of the trophy the pop-up tab on the inside of the card, now your card is finished all that left to do is write in your own personalised father's day message.
