

Roman horse and chariot

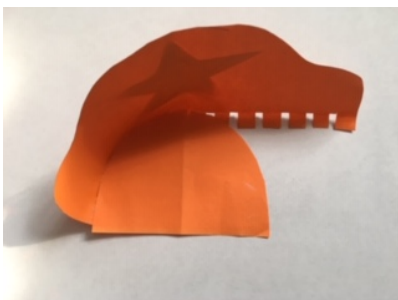

You will need: template, coloured card or paper, scissors, glue.

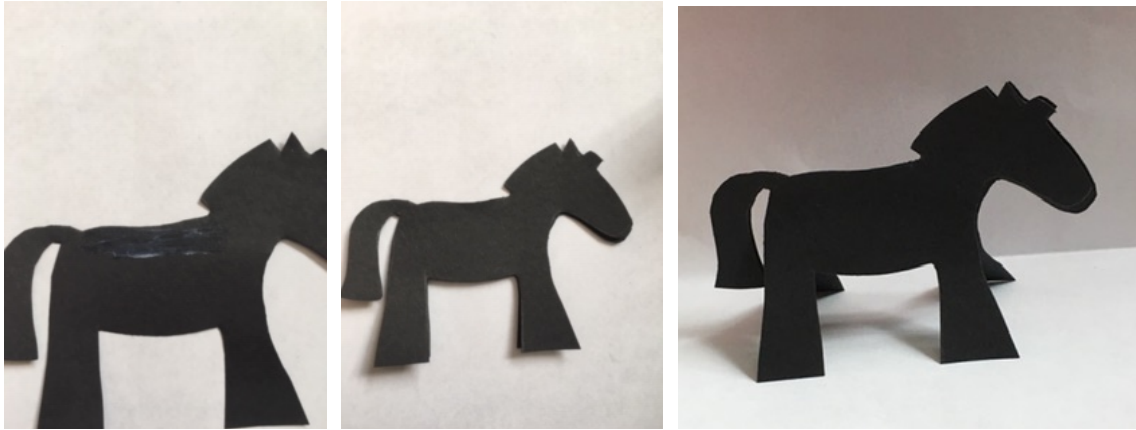

Start by cutting our shapes from template.

Next glue the star to the front of your chariot. Turnover and gently fold all the tabs over then lightly glue each of the tabs.

Slowly fold the front of the chariot around the base gently pushing down on the tabs to help them stick. Then turn chariot over and glue wheels in place so that they overhang the bottom. Leave to dry.

To make the horse take one of the cut outs and place a small strip of glue along the back and then place the other cut out on top leave to dry. Once dry gently down on the horse to make it stand.

To finish use the long strips of card to attach your horse to your chariot.
